EDUCATION

Sri Venkateswara College of Engineering — **Tirupati, India**
B.Tech, Computer Science & Engineering (Cyber Security) — Aug 2024 – May 2027
CGPA: 9.33

Dr. K.V. Subba Reddy Institute of Technology — **Kurnool, India**
Diploma, Computer Science & Engineering — Nov 2021 – May 2024
Percentage: 82.44%

TECHNICAL SKILLS

Languages: Python, JavaScript
Frontend: HTML, CSS, React.js, Tailwind CSS
Backend: Node.js, Express.js, FastAPI, REST APIs
Databases: SQL, MongoDB, Firebase Realtime DB
Cloud & DevOps: AWS, Git, GitHub, Docker, Linux

EXPERIENCE

Udr Crafts | Full Stack Intern — July 2026 – Present

- Developed a **Delivery Partner Portal** using the **MERN stack** (MongoDB, Express.js, React.js, Node.js), implementing **authentication**, partner onboarding, profile management, and document upload workflows.
- Built **RESTful APIs** and secure backend services while developing responsive React interfaces, following clean architecture and **Git-based** collaborative development practices.

Infosys Springboard | Intern — July 2026 – Present

- Developed a full-stack **Job Portal** with role-based dashboards, enabling candidates to search and apply for jobs while allowing recruiters to post openings, manage applications, and send email notifications.
- Built an **AI-powered Resume Evaluation** and **ATS Scoring System** that extracts key skills, analyzes resumes, ranks candidates, and generates recruiter-facing reports.
- Architected **RESTful APIs** and optimized database schemas for job postings, application tracking, AI-based resume screening, and personalized job recommendations.

FlyRank | Backend AI Engineer Intern — July 2026 – August 2026

- Developed RESTful APIs using **FastAPI** with **CRUD operations**, input validation, standardized HTTP responses, and interactive **Swagger/OpenAPI** documentation, secured with **Supabase Auth** and **JWT** via reusable middleware for protected routes and session management.
- Designed a multi-platform publishing system using the **Adapter Pattern**, enabling encrypted **OAuth token storage**, rate-limit handling, and automatic retry mechanisms.
- Containerized the application using **Docker** and built a reliable job scheduling system with **webhook processing** for automated content publishing.

PROJECTS

Artistic | MERN Stack, MongoDB, Express.js, React.js, Node.js, Google OAuth — GitHub | Live

- Engineered a full-stack custom art platform using the **MERN stack**, implementing a structured **6-stage order lifecycle** and passwordless authentication with **JWT, Google OAuth, and Email OTP**.
- Developed a **role-based Admin** Dashboard featuring interactive revenue and user analytics using **Chart.js/Recharts**, alongside a two-stage payment workflow with automated PDF invoice generation.
- Architected scalable **RESTful APIs**, optimized **MongoDB schemas**, and integrated **AWS S3** for secure storage of high-resolution artwork.

Student Information Manager | HTML, CSS, JavaScript, Firebase, Docker — GitHub | Live

- Developed a responsive student management system with CRUD operations and real-time synchronization using **Firebase Realtime Database**.
- Containerized the application using **Docker** and deployed it through an end-to-end DevOps workflow on Firebase Hosting.

CERTIFICATIONS

- GitHub Foundations – **GitHub**
- Oracle Foundations Certified Associate – **Oracle**
